Model : Topguide Pulley Endcap Assemblies Stainless Steel

Pulley Endcap TG SS ASSEMBLY

Part # **A2423**

New Features: The new Stainless Steel Pulley Endcap assemblies will be used on all topguide and deck mount systems using the standard topguide track. These new pulleys will be sent automatically in the guide hardware kits.

Description of Features: These new pulleys will be used in the same way as the stainless steel pulleys for the underguide track with the tongue on the pulley assembly sliding into the splice channel of the track.
